

# OPIOID TOOLKIT

## *A Dose of Reality for Employers: A Toolkit to help mitigate the risks associated with Ohio's Opioid crisis.*

To help Ohio employers deal with the opioid crisis in their workplace, the Ohio Chamber of Commerce, with expertise from member company Working Partners® and financial support from member company Anthem, created a free, online employer toolkit.

*A Dose of Reality for Employers* includes a 5-module course (13-16 minutes long per module) which gives an overview of the legal and operational issues an employer must consider in dealing with an employee's use of opioids and other substances. The modules include best practices that employers can use in their workplace from implementing a drug-free workplace program, to crafting solid workplace policies, to offering an employee assistance program and much more. Although each module contains valuable information, it is not necessary that they be watched in order or in their entirety. Each module also has printable resources that employers can use in their workplace.

*The toolkit can be found on the Ohio Chamber's website at [www.ohiochamber.com/opioid-toolkit](http://www.ohiochamber.com/opioid-toolkit)*

*It is available to all companies in Ohio and we encourage everyone to use and share the information.*
