COLUMBUS, OHIO – The below statement can be attributed to Ohio Chamber President and CEO Steve Stivers regarding Congress’s passage of the CHIPS Act.

“The Ohio Chamber of Commerce commends Congress for its bipartisan passage of the Creating Helpful Incentives to Produce Semiconductor for America Act (CHIPS Act).

The CHIPS Act will strengthen America’s manufacturing industry, overall economy and national security by providing funding that is necessary to achieve our goal of domestic U.S. semiconductor chip manufacturing. The United States must reclaim its leadership role in the next generation of innovation and research by ensuring the strength of its domestic supply chains.

The transformational investments being made in Ohio, bolstered further by the passage of the CHIPS Act, will attract thousands of direct and indirect jobs and establish our state as the cradle of the Silicon Heartland. I want to thank the members of Ohio’s delegation from both parties who voted in support of this legislation. Ohioans will be positively impacted by this vote for generations.”
