President Joseph R. Biden, Jr.  
The White House  
1600 Pennsylvania Avenue NW  
Washington, DC 20500

Dear President Biden:

Congress, through such legislation as the CHIPS and Science Act, the Building Chips in America Act, and other pieces of legislation, has made critical investments in the development of domestic semiconductor manufacturing capabilities in facilities across the country. We are grateful for your efforts to ensure these laws are enacted with clarity and expediency but are growing concerned that federal funds associated with these laws are not being distributed in a timely manner that allows the American people to fully capitalize on the opportunity to reshore and expand this critical industry.

We, the undersigned organizations, write to implore you and officials across your Administration to take decisive steps ensuring that federal funds made available by the Department of Commerce, the Department of Defense, and others across the federal government be delivered to their intended recipients—entities who have applied for federal grants or entered into contractual partnerships to manufacture semiconductor chips in the United States—in the next thirty days.

We urge you to work with members of your Cabinet and staff across your Administration to remove any roadblocks that may exist, ensuring that the funds highlighted as critical to the success of the objectives of these laws are delivered as promptly as possible.

Thank you in advance for your time and dedication to this matter.

Sincerely,

Ohio Chamber of Commerce
